Practice Education Guidelines for BC
Orientation - Students

August 2021

Intent / Purpose

- Identify the pre-requisites, orientation requirements, and expectations for the various types and categories of Students who enter Health Care Organizations (HCO) for a practice education experience.

- Outline the responsibilities of the Post-Secondary Institutions (PSI) and HCOs for the orientation and training of the Students on relevant Occupational Health and Safety practices, based on the definition of 'worker' specified in the Workers Compensation Act\(^1\) and 'young or new worker\(^2\) specified by WorkSafeBC.

Definitions

<table>
<thead>
<tr>
<th>Definition</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Orientation</td>
<td>&quot;...the process of introducing new, inexperienced, and transferred workers to the organization, their supervisors, co-workers, work areas, and jobs, and especially to health and safety&quot;(^3)</td>
</tr>
<tr>
<td>Supervision</td>
<td>Oversight of Students while in the HCO. Except for strictly observational practice experiences, the supervisor does not necessarily have to be present or in close proximity but is accessible when needed. The degree of supervision is adjusted based on the Student's demonstration of competence. Supervisors remain responsible and accountable for the actions of the individual under their direct or indirect supervision.(^4) (^5) (^6)</td>
</tr>
<tr>
<td>Supervision - Direct</td>
<td>The supervisor is physically present either at all times (constant supervision), at certain times (constant supervision while doing an activity), or in close proximity to directly observe and support or intervene as needed (close supervision). For strictly observational practice education experiences, direct supervision means physically present at all times (see definition: Observation). Other terms: Close supervision, constant supervision</td>
</tr>
<tr>
<td>Supervision - Indirect</td>
<td>The supervisor is accessible, either in person (working in the same area) or through technology, to provide guidance, direction, and support as needed, and to regularly review Student progress through activities such as case conferencing and debriefing. Other terms: general supervision, remote supervision (supervision from a distance)</td>
</tr>

Practice Education Guidelines

Orientation of Students to the practice education setting is a shared responsibility between the PSI and the HCO.

PSIs assist HCOs meet their obligations to orient and prepare all those involved in health care and service, including the requirements for 'young or new workers' under the Occupational Health and Safety Regulations⁷ by educating Students on basic workplace health and safety practices.⁸

Relevant pre-requisites are completed before the start of the practice education experience.

The orientation to the HCO practice education setting is completed within the first week of the practice education experience:

- The extent of the pre-requisites and orientation depends on the duration of the experience, the degree of involvement in health care and services (observational vs. participation), and the degree of supervision (direct vs. indirect). (See Appendix A)

- For any practice education experience that involves taking part in health care or service with either direct or indirect supervision, the Student will have a working knowledge of the relevant Occupational Health and Safety practices. (See Appendix A)

HCO employees taking part in a practice education experience within any HCO (including their own) as Students provide their PSI with a completion record of the relevant pre-requisites and orientation topics or equivalent.

The responsibility for providing setting-specific orientation depends on the duration of the experience, the degree of involvement in health care and services (observational vs. participation), the degree of supervision (direct vs. indirect), and who the primary supervisor is (PSI Educator or HCO Supervisor).

The HCO has authority to delay or cancel the practice education experience if there is evidence that the pre-requisites or orientation requirements have not been met.

Practice Education Guidelines for BC
Orientation - Students

Roles, Responsibilities and Expectations

Post-Secondary Institutions

- Communicate the pre-requisites and orientation requirements to Students.
- Educate Students on basic workplace health and safety practices as per the Occupational Health and Safety Guidelines, Part 3 – G3.23 Young or New Workers.\(^9\)
- Ensure Students meet all the relevant pre-requisites before or at the start of the practice education experience. (See Appendix A)
- Ensure Students:
  - Complete relevant HCO 'core' orientation topics and any HCO specific orientation (See Appendix A).
  - Have relevant and current certification, licensing, or professional registration, where applicable.
  - Are adequately prepared to enter the practice education setting.
- Maintain the completed orientation checklists.
- Contact the HCO Practice Education Coordinator when there is a question or concern surrounding pre-requisites or requirements for orientation.

PSI Educators

- Ensure the Student is aware of the expectations and limitations of Student practice while in the practice education setting.
- Ensure the Student completes the relevant pre-requisites before starting the practice education experience.
- Coordinate the Student’s orientation to the practice education setting with the HCO Educator.

Students

- Complete all relevant pre-requisites and orientation requirements (See Appendix A) within the expected timeframe.
- Provide PSI with completed orientation checklist.
- Provide proof of completion of relevant pre-requisites and orientation requirements, if requested.
- When taking part in health care or service:
  - Have a working knowledge of workplace health and safety policies, procedures, and guidelines.
  - Know how and where to access policies, procedures, and guidelines that support the practice education experience.
  - Know the limits and restrictions on activities and tasks of the Student role (see PEG Student Practice Activities, Limits, and Conditions).
  - Request education and/or supervision when exposed to new or unfamiliar procedures, activities, or equipment.
- Comply with HCO and PSI policies, protocols, and/or procedures, including those related to confidentiality and workplace health and safety.

Health Care Organizations

- Communicate the pre-requisites and orientation requirements to the PSIs, including HCO specific policies and protocols such as those related to confidentiality and workplace health and safety.
- Support Student’s orientation to the practice education setting as required, including:
  - access to the site (such as identification, card access, educational space)
  - resources and documents (such as online policies, protocols, procedures, courses, information systems, equipment, and supplies)
  - learning opportunities needed to meet the HCO requirements
- Conduct intermittent audits to confirm that pre-requisites are completed and/or orientation requirements are met.
- Request proof of completion of pre-requisites and/or orientation requirements, when needed.
**HCO Supervisors**

- When supervising the Student in the practice education setting:
  - Confirm the Student has completed the relevant pre-requisites before starting the practice education experience.
  - Complete the orientation to the practice education setting within the first week of starting the practice education experience to the extent warranted by the duration of the experience, the degree of involvement in health care and services (observational vs. participation), and the degree of supervision (direct vs. indirect).
  - Assist the Student to comply with HCO and PSI policies, protocols, and/or procedures, including those related to confidentiality and workplace health and safety.
  - Confirm the expectations for learning with the Student, and PSI Educator as needed.
